

The preferred embodiment of the tubing is metal of various thicknesses, but could be made of plastic of various thicknesses.

CLAIMS

What is claimed:

1. An Easy Horn Holder comprising:

A shoulder harness that slides over the shoulder, mounted to the easy horn holder; the Easy Horn Holder is designed to be adjustable vertically, inward and outwardly, and rotated clockwise and counter clockwise.

2. An Easy Horn Holder of claim 1 wherein:

Shoulder harness that slides over the shoulder; mounted to the easy horn holder, includes adjustable angle assembly that mounts to the harness to provide the proper height.

3. An Easy Horn Holder of claim 2 wherein:

Adjustable angle assembly connected to the telescoping tube holder that swivels left and right for position. Sleeve tightens with wing nut holder to position desired once it's achieved.

4. An Easy Horn Holder of claim 3 wherein:

Telescoping/swivel tube mounts to the telescoping tube holder for inward and outward and swivel positioning of musical instrument.

5. An Easy Horn Holder of claim 4 wherein:

Swivel tube holds the swivel tube clamp that can rotate clockwise and counter clockwise and tighten once desired position is achieved.

6. An Easy Horn Holder of claim 5 wherein:

Mounted to the swivel tube clamp is the horn mounting plate.

7. An Easy Horn Holder of claim 6 wherein:

Mounting plate comprised of horn clamps with cushions that mount to the musical instrument.
